

ABSTRACT OF THE INVENTION

5 2-Methyl-4-(4-methyl-1-piperazinyl)-10H-thieno-  
[2,3-b][1,5]benzodiazepine, or an acid salt thereof, has  
pharmaceutical properties, and is of particular use in the  
treatment of disorders of the central nervous system. The  
compound has the following structure:

0012241622100
